

# Let's Talk.

talkover

## Introducing the SM2+ with Talkover

The sound gurus at Sound Projections have added a talkover feature to the Sound Machine. When the switch is actuated, speaking on wireless mic 1 automatically fades all other inputs so your voice comes through loud and clear; stop speaking and the program material smoothly returns to normal volume. (No more running over to your sound system to lower the music when you want to make an announcement.)

The SM-2+ is available now; call us, and let's talk.
